High-Profile Downtown Parking Gets High-Performance Solution with Stondeck

After Stondeck XD2 was installed in this busy, downtown parking garage, it was able to provide visitors with an exceptional parking experience thereby effectively supporting area businesses.

Products used at Union Street Parking Garage
• Stondeck XD2

Rester Management of downtown Montreal required a solution to repair and restore the membrane of the underground parking garage on Union Street, a high-profile location in this Canadian city. The garage is connected to The Hudson's Bay Company by the underground pedestrian network. Operators chose to utilize a combination of colors to provide a design-friendly environment, offering customers with a safe, brighter, and better parking experience.

Stondeck XD2 was installed in this high-traffic garage for a combination of slip and wear resistance and superior aesthetic properties. The project consisted of 64,000 square feet throughout the parking garage in two colors. The end result is a highly satisfied customer with a clean safe parking surface.

Stondeck XD2 is a flexible, urethane parking deck coating system that provides a chemical and slip-resistant surface for indoor covered parking decks, underground parking garages, and walkways. It cosmetically enhances parking facilities, reduces tire noise, and provides a brighter environment for both vehicles and pedestrians.

Before and after installation of Stondeck XD2 for superior protection.

The Stonhard Difference

Stonhard is the unprecedented world leader in manufacturing and installing high-performance polymer floor, wall and lining systems. Stonhard maintains 300 Territory Managers and 175 application crews worldwide who will work with you on design specification, project management, final walk through and service after the sale. Stonhard's single-source warranty covers both products and installation.
