

## STONCRETE EFX VS. POLISHED CONCRETE

### FEATURES & BENEFITS

STONCRETE EFX

#### STONCRETE EFX

- Quicker installation turnaround
- Can be installed over concrete
- Available in 15 color options
- Available in many finishes, along with 3 choices of aggregate
- Easy to repair
- Can fix and cover cracks
- New and existing projects
- Higher durability when compared to polished concrete
- Stain resistant
- Excellent compression strength (10,000 psi)
- High-performance urethane topcoat
- Texture options available

#### POLISHED CONCRETE

- Old concrete to be removed first with no marks prior to installation
- Need to order polished concrete mix supply
- Special order needed for colors
- Repairs always visible
- Cracks always visible
- Mainly new projects (with proper planning)
- Less durable than Stoncrete EFX
- Not stain resistant, can be porous
- Typical concrete compression (3,500 psi)
- Very thin sealer used in installation
- Adding texture is not an option with polished concrete
