

World Leading Food & Beverage Company Selects Stonhard Floors for New Production Line

Products Used: Stonset® TG6 • Stonclad® UT
Application Area: Production Line

PROBLEM

A world-leading beverage company needed a flooring solution to withstand the demanding conditions of its production facility. A time-sensitive upgrade, this space called for a complete replacement of the filling production line and movement of existing drainage from the middle of the room to the perimeter.

SOLUTION

Through in-depth site surveys and meetings, the product solutions and installation procedures required to meet the client's expectations were determined. Stonhard's Stonclad UT, a 6mm thick urethane mortar system was selected. This heavy-duty industrial flooring system ensures uninterrupted water flow to the drain system and prevents puddling on the floor. Other benefits include durability, slip resistance, and the ability to withstand high temperatures, thermal shock, high-pressure cleaning, chemicals, moisture, and heavy loads.

Stonhard faced a tight schedule but met the required deadline within eight days. This included: removal of the existing production line and industrial tile; installation of a new drain; reprofile of the floor's pitch; and installation of the resinous floor.

DESIGN ELEMENTS

Color: Mint
Texture: Light
Floors sloped to drains

OUR CERTIFICATIONS & MEMBERSHIPS

Stonhard products for food and beverage manufacturers are certified by HACCP International. Stonhard is a member of the U.S. Green Building Council and is on the Manufacturer Advisory Panel for the HPD Collaborative.

THE STONHARD DIFFERENCE

Stonhard is the unprecedented world leader in manufacturing and installing high-performance seamless, resinous floor, wall and lining systems. With more than a century of experience, Stonhard provides its customers with a single-source warranty covering both products and installation.
